

SmartERP is a comprehensive information system that addresses all the needs of an enterprise with the process view of an organization, to meet the organizational goals and integrate all the functions of the enterprise. SmartERP is a fully scalable, robust and 100% Web based Enterprise Resource Management System that automates both internal and external processes of your company. SmartERP includes a solid ERP software backbone along with intuitive CRM, decision support and e-business modules and a powerful technology infrastructure -- all the tools you need to enhance the productivity and profitability of your operations. SmartERP can be interfaced with any of your other legacy systems easily.

SmartERP - Salient Features

Fully Integrated Solution that meet all your real-time requirements.

Complete Enterprise Functionality – ensure standardization of your processes and guarantees ROI.

Web Based Solution, that ensures hassle free Deployment, easy Maintenance and excellent User Interface.

No Client Installation. Just a browser is needed for accessing from any client machine. Relieves you from the troubles of installation of client software at client machines. Upgrading the product in feature is no more a cumbersome task as only server software is upgraded and no client installation. Resulting into Easy Maintenance, Trouble Free Access and better GUI.

Access the application from any client machine irrespective of Operating System of the Client, System Configuration etc.

Lower cost of Ownership. Unlimited User Access License.

No additional investment on server side software.

Complete End-to-End solution.

Interfacing with any other applications that are running at your corporate will be an easy task with SmartERP. Interfacing is dynamic and automated process and ensure data sharing between applications the way your business logic is requiring them.

Central Excise Reports inbuilt and relieves you from the tedious process of Excise Reports.

With Report Generation Manager you can generate both Graphical (Bar Chart, Pie Chart etc.) and data (tabular) reports of your choice at any point of them with necessary filtering (search) criteria on them.

Access the system Anywhere, Anytime as you wish.

Inbuilt Approval Logic Workflow Manager for meeting any kind of approvals (parallel, serial etc.) with escalation / time expiry options.

Inbuilt Security Control System (SCS) for access rights.

Working Module

- ⊙ Inventory Control & Material Management

"SmartERP increase your sales, increase Organizational Productivity, reduce Operational Cost, reduce Procurement Cost and Standardize your business	Job Management	

environment”

“SmartERP is developed with the most future-oriented technology and is flexible enough to support your wide and varied range of business activities”

SmartERP simplifies back-office process automation for mid-sized and growing businesses. It provides real-time visibility into financials, order management, purchasing, inventory, employee management, e-commerce and more. With SmartERP, you'll accelerate business cycles, improve productivity and reliability, and provide higher levels of service to customers, suppliers and partners.

Reduce IT Costs and Maintenance. As a Web-based solution, SmartERP significantly reduces your total cost of ownership. There is no software to install, no hardware to purchase and maintain, and no upgrades requiring complex re-implementation over time.

SmartERP gives you a real-time snapshot of your business, enabling you to make better, faster decisions. You can view leads, commissions, sales revenue and forecasts, new cases and more
