SSTPL's SmartBanc is a 100% secured and fully loaded Banking Solution (Core Banking / TBA / Internet Banking) that caters to the requirements of Banks and Financial Institutions with unequalled level of sophistication. With SmartBanc, Banks and Financial Institutions can focus on expanding their customer base, thereby increasing revenues and operational efficiencies. SmartBanc is developed with latest Microsoft .NET Framework that ensures easy deployment, highest performance and easy user interface. SmartBanc is designed in such a way that every user of the bank can easily navigate and get their requirements done. Surprisingly SmartBanc is offered to Banks at very economical price to suite their budget without compromising on the functionality or quality. SmartBanc is designed to meet high volume users and supports larger concurrency factors. SmartBanc can be instantly interfaced with any core banking solutions for easy exchange of data. Mobile Banking Functionalities of SmartBanc helps banks in extending their services at arm's length.

SmartBanc allows customers to conduct all banking transactions from home, workplace, or anywhere in this planet as if they were in a bank. SSTPL's rich expertise in Banking solution deployments coupled with modular and scalable design of SmartBanc makes the product flexible and convenient to use, both for the bank and its wide range of customers, including corporate, retail and high net worth individuals. SmartBanc can be readily and easily interfaced with any of your core banking solutions. SmartBanc can be configured to work both on central and distributed Core Bank networks.

The Browser based approach relieves the bank from instant expansion for both TBA and other Delivery channels. SmartBanc can be readily interfaced with Tele-Banking, ATM, etc. Financial Accounting module of SmartBanc takes care AP, AR, GL, TB and other requirements.
