

Makes Your Business Effective

SmartContract is a 100% web based Contract Management Solution which SmartContract streamlines the entire contract tracking process right from the creation of contracts, and store them in a single electronic repository to manage all aspects of the contract life cycle. It helps your organization meet *contract compliance* regulations, centralize your contract tracking, and improve your overall contract administration minimizing contract cost. SmartContract can manage any type of contracts.

ROI can be quickly realized through reduced manual processes and improved quality of the contract-related information captured, coupled with the automated monitoring and management of performance, compliance and risk.

SmartContract is featured with the following functionalities:-

Benefits:-

Completely web-based
High Performance
Secured & Scalable
End-to-End Solution
User-Friendly Interface
Economic
Quick Implementation
Multilingual Support
Easy Maintenance

Easy Integration

- SmartContract works as a Contract Repository where you can create a new contract with Contract Details, Terms and Condition, Vendor Details, Time Schedule, Distribution of Responsibility to Respective Departments, payment schedules etc.
- Powerful search capabilities enable users to quickly find a single contract or a collection of contracts for reference or research.
- Resource (man-hour) allocation to Project Managers, Team Leaders, Team Members.
- Track contract in respect of time schedule, payments, vendor info etc.
- Tracks budgeted contract amount vs. actual amount.
- Tracks contract amendments, changes, notes.
- Personal 'Dashboard'
- Related documents can be scanned and attached.
- Comprehensive permission controls ensure contracts and terms are only visible to approved users.
- Analytical reports to examine supplier price variances, examine contract usage throughout the enterprise to uncover overlapping contracts and volume consolidation opportunities.
- Approved Logic Workflow Approach is to create any type of approval cycles. It supports both user based and user role based approach.

Technology:-

1. ASP.Net 3.5
2. MS SQL 2005 / 2008

You can get maximum realization of revenue and cost savings potential by maximizing the benefits of each contract through event management and performance & compliance monitoring.
