SunSmart Technologies had built the reputation of being a reliable software house that takes complete, end-to-end responsibility of software design, delivery, implementation and support. We offer the cumulative expertise of global best practices learnt by serving global leaders and by expertise of our technology team.

SunSmart Technologies is equipped with dedicated team and the state-of-the-art infrastructure, which are tuned to achieve the mission of the Company. Our Off-Shore Development Center is equipped with the latest software, tools and systems to carry out design, development, and testing, training and off-site support to our customers. The hardware and software infrastructure at our ODC is capable of handling major projects to satisfy the client's needs.

SunSmart Technologies is led by an experienced management supported by a dedicated team, consisting of Consultants with expertise on Domain, Software development and Project Management. Consistent and periodical training of the team on technology, domain and tools, result into maturity levels that offer the customers, solutions with global competency.

As a software solution provider, we made even our development activities automated. We have developed Rapid Application Development (RAD) tools, which totally automate the development environment and significantly reduce the deployment time. The advantage is customers are getting high quality, uniform and proven solution at an affordable cost.
